

Pure iEook

Pure iCook Overview Chart

Amazing Features To Help You

Straight From The Menu

With Pure iCook, you can expect unparalleled connectivity with your digital restaurant menu. That means, your kitchen system will be notified of an upcoming order as soon as your waiting staff generates an eKOT on the Application. As a result, not only can you reduce the amount of time taken on an order but you can also avoid repetition of orders and ensure that no orders are missed due to human errors.

Efficiently Manage all Guest Orders

Helping you to adequately manage the orders, Pure iCook will immediately send over any orders that need to be prepared in the kitchen or the bar station to the kitchen display system, to the kitchen printers or both. Thus, including all the required the kitchen printers, print the orders in the sequence for the staff to see.

Additionally, the kitchen management system also displays live status of all current orders as well as upcoming orders, ensuring that no orders get missed, enabling the service teams to track order status, offer utmost transparency and the best dining experience.

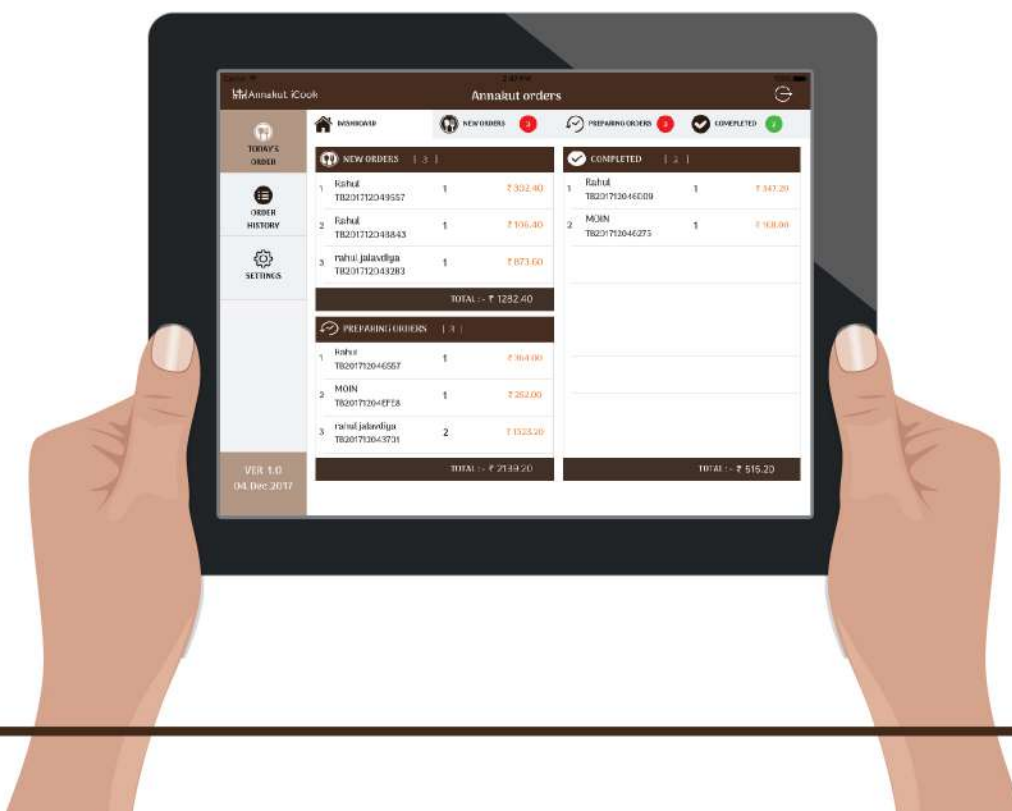

Maintain Order History to Evaluate The Business

Along with displaying the active food orders in the kitchen, the system can also be configured to maintain a brief history of all the orders coming in. As a result, you can evaluate all your best selling and worst performing dishes and plan your marketing strategies accordingly. Additionally, with that information along with the sales data coming in from POS, you can even tally your profit and losses for a better understanding of your restaurant business.

Integrated Online Ordering

Time is of the essence when it comes to Online orders. With Pure iCook, any orders placed online can be automatically routed to kitchen display screens without requiring a staff member to manually re-enter the order into the POS system. As a result, all orders are fully integrated into your operations, increases the pace of orders and nothing is lost in the shuffle.

More About Pure iCook

With total perfection and skills Pure iCook is a complete package for the Restaurateurs and Chefs to manage their kitchen operations smoothly without any hindrance. With using the latest technological tools we have created a system which is user friendly as well as well equipped at the same time. Pure iCook is one stop shop to manage your day to day working systematically whether the orders are from restaurant menu itself or from online third party source.

Our prime focus is to run your business in a manner where it achieves a prestigious position in the restaurant industry primarily based on three verticals i.e Menu Ordering, Kitchen Management System and Point of Sale. Being a leader in the global market of providing hospitality softwares, there is a big role of our dedicated techno freaks in it. From researching to making it concrete without our dedicated team it wouldn't have been possible. Making your growth in the hospitality industry worthy we have a perfect solution by giving you Pure iCook.

Why Pure iCook ?

Improve Accuracy and Enhance Communication

A classic alternative to the haphazard paper tickets that are often lost in the confusion while handwritten tickets are usually unintelligible- leading to errors in order preparation. Pure iCook is all about bringing efficiency to this chaotic restaurant kitchen.

Happier the guest, more the revenue

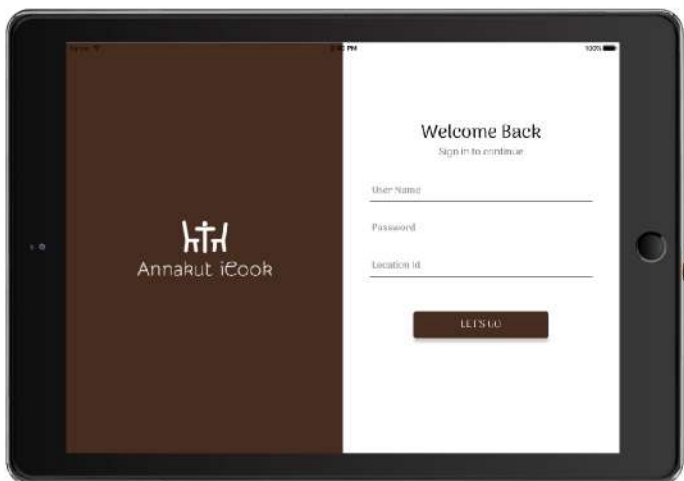

As a result of the improved order accuracy and quick delivery of food on the table, your guests are happy with your service. Happy guests always lead to an upsurge in the restaurant business.

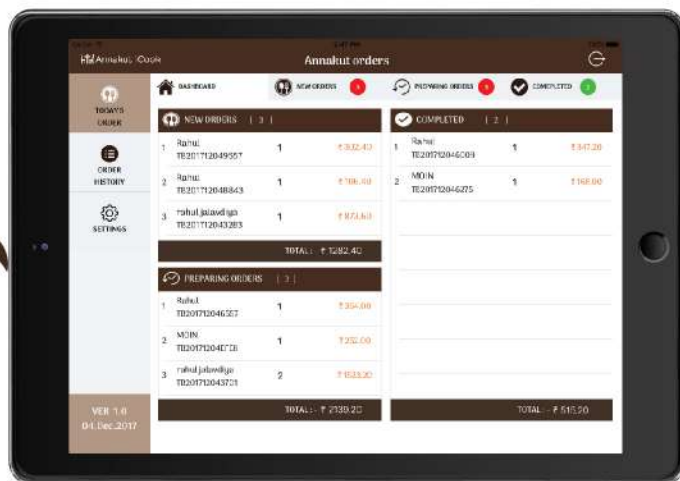

Truly Integrated System Results in Improved Guest Service.

Giving you a complete suite of restaurant technology, Pure iCook kitchen management system is seamlessly integrated with your restaurant POS as well as the digital restaurant menu. Thus, any order placed on the Menu App is automatically updated on the POS as well as the KMS, which saves time, improves accuracy and enriches guest experience.
